

Graphing With Original Skittles

~ Graphing With Skittles ~

The reward at the end of the journey can often be the greatest motivator.

Graphing with Skittles was so much fun. I just had to share these graphs with you. It is easy. We have not done much graphing up to this point and this was a simple and very fun way to begin to look at graphing.

Making these simple little graphs also started the creative juices flowing... what else can we graph? Well, I am keeping that a secret, for now. Come visit us again at www.sunflowerschoolhouse.com and look for more graphing activities.

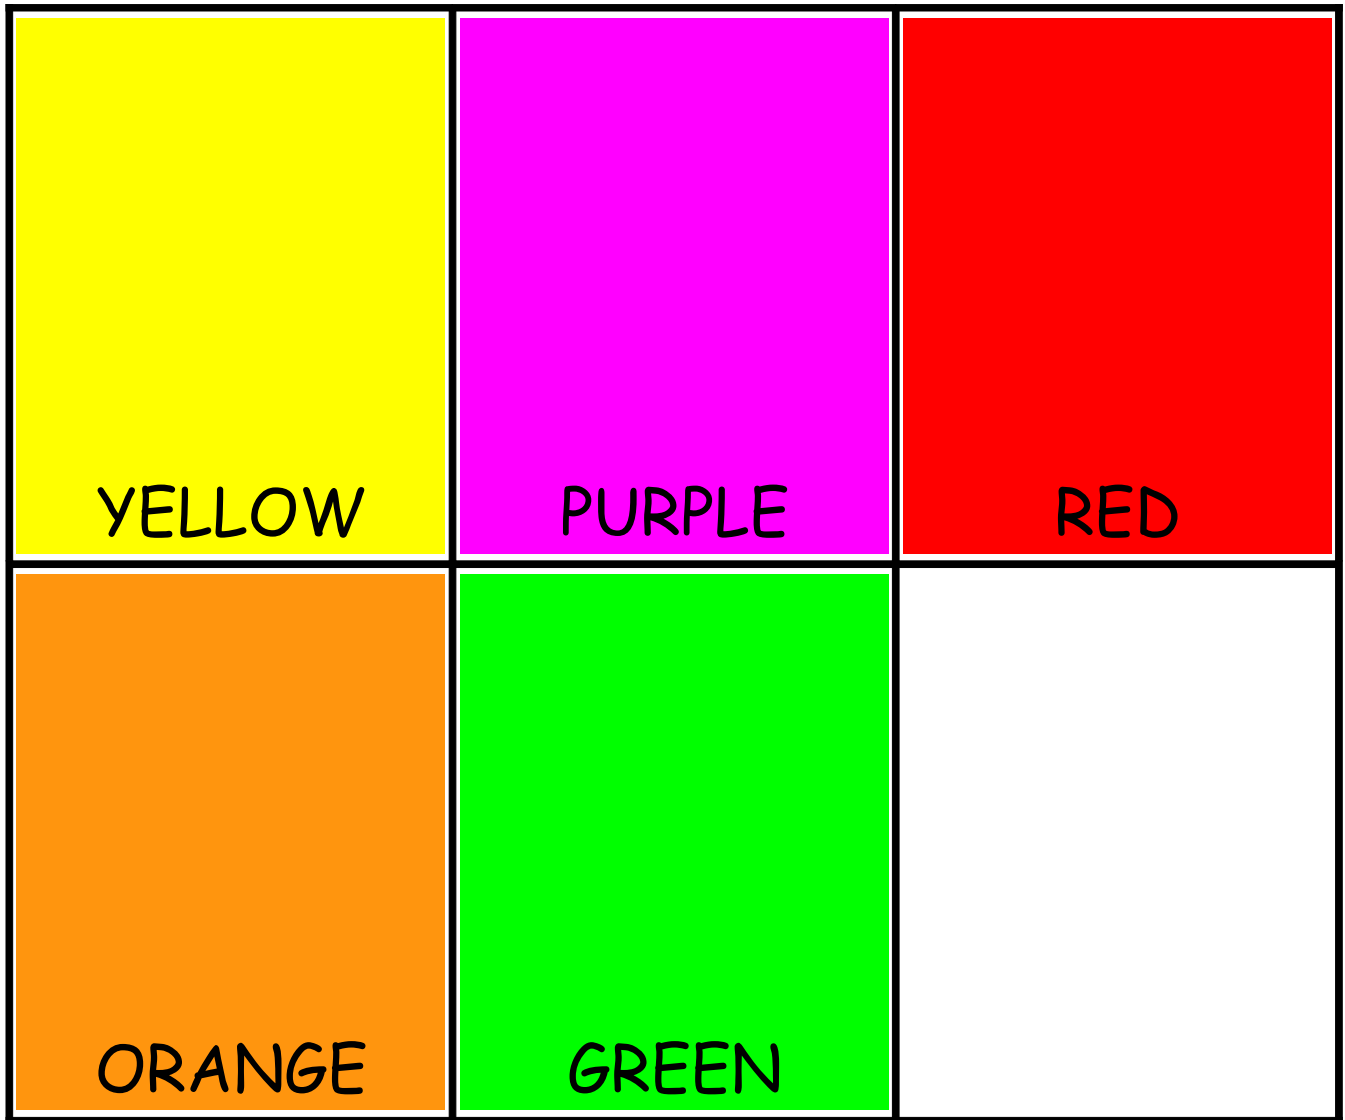

Thanks for joining us.

Blessings

Honey
