

STICKER DOT
ALPHABET

CREATED BY HONEY BROWN

INTRODUCTION

Welcome to the Sticker Dot Alphabet.

I created these letter pages originally for my son to work on his name. I printed out the letters in his name and he had a blast putting the stickers on them. I figured since he enjoyed it so much that I would create the whole alphabet and make it available.

When I went looking for stickers to use with this project, the only ones that I could find were white. I decided to print the letter sheets on colored paper and have him use the white dots. He loved it.

Blessings
Honey
