

STICKER DOT  
NUMBERS

CREATED BY HONEY BROWN

# INTRODUCTION

You can't have a Sticker Dot Alphabet without Sticker Dot Numbers, so here they are.

The Sticker Dot Alphabet was originally for my son to work on the letters in his name. I printed out the letters in his name and he had a blast putting the stickers on them. I figured since he enjoyed it so much that I would create the whole alphabet and make it available.

It is only natural to make a set of numbers to go with the letters. I hope you enjoy.

I was able to make the numbers 0-19. For any numbers over 19 you can just use to single numbers together. I was also able to make the add, subtract, and equals signs.

Blessings  
Honey
