## Welcome to The Simile Game!

A game is the perfect way to learn something new. The Simile Game was created to help my boys learn about similes. A simile is a fun literary device and learning about them can be fun too. This game can help.

**Dice:** You will need a regular dice for this game. If you roll an odd number then move 1 space. If you roll an even number then move 2 spaces.

**Game Pieces:** You can use colored paperclips or a variety of coins as your place markers.

**Game Board:** The game board is simple and could be used as a file folder game or in your workboxes.

**Cards:** There are 50+ cards in this game. Some cards contain the definition of a simile so that it can be reviewed. Some cards contain examples of similes. Some cards give you a chance to create a simile with a prompt. There are blank cards in this package for you to make your own example cards and your own create cards.

**Game Play:** The game play is simple. You roll the dice and move your marker. If you land on a space that says draw a card, then you draw a card and read it. You play until someone wins.

I hope you enjoy this game.
